Integrated health care is a new approach to employee benefits that connects employee medical, pharmacy and vision data for better health outcomes. Advantages of integrated care include:

**Drug Interaction Prevention**
- Prevention of possible drug interactions with glaucoma medications through secure sharing of prescription information with doctors and pharmacists.

**Exam Reminders**
- Reminders can be sent to employees who haven’t had a comprehensive eye exam to check for glaucoma.

**Savings Alerts**
- Employees can be alerted to savings on lower cost glaucoma medications.

**Complete Data**
- Clinical studies and real-world data on glaucoma medications are used to determine preferred medications and drug list tiers.

---

**Overview**

Glaucma is a leading cause of blindness in the U.S.

3 million people have glaucoma.

1.5 million aren’t diagnosed.

African-Americans are 4 TO 5 TIMES more likely to develop glaucoma.

---

**Impact**

Glaucma costs the U.S. economy at least $2.86 billion every year in medical costs and productivity losses.

**Preventing Vision Loss**

Regular eye exams for early detection – vision loss can be prevented or halted if found early.

Stay on prescribed medications for treatment – taking medicines as prescribed can prevent or slow the progression of vision loss.

Only 10% of patients stay on prescribed eye drops after one year.

---

**Promoting vision health at work**

Encourage regular comprehensive eye exams.

Promote adherence to medicines exactly as prescribed.

Provide eye protection.

Offer assistive technology for those with low vision.

---

**The value of integrated care for glaucoma**

Integrated health care is a new approach to employee benefits that connects employee medical, pharmacy and vision data for better health outcomes. Advantages of integrated care include:

---

Glaucma by the numbers

Glaucma is a group of diseases that damage the eye’s optic nerve and can result in vision loss and blindness. How can glaucoma impact your business?
